This brochure provides information about the qualifications and business practices of Waterloo Capital. If you have any questions about the contents of this brochure, please contact us at 512-777-5900. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority. Registration with the SEC or state regulatory authority does not imply a certain level of skill or expertise.

Additional information about Waterloo Capital is also available on the SEC's website at www.adviserinfo.sec.gov.

Item 2: Material Changes

This Firm Brochure is our disclosure document prepared according to regulatory requirements and rules. Consistent with the rules, we will ensure that you receive a summary of any material changes to this and subsequent Brochures within 120 days of the close of our business fiscal year. Furthermore, we will provide you with other interim disclosures about material changes as necessary.

The following material changes were made to this Brochure since the last annual update issued on March 20, 2025:

- Enhanced disclosures regarding sub-adviser services and fees. Please see Item 4 of this Brochure for information on the firm's services, and Item 5 for the firm's fees and compensation.
- Added disclosure regarding a Waterloo Capital investment adviser representative's registration with Pickwick Capital Partners. Please see Item 10 of this Brochure for additional information and conflicts of interest.

Item 4: Advisory Business

A. Waterloo Capital, L.P.

Waterloo Capital, L.P. (dba "Waterloo Capital" and/or the "firm") is a partnership organized under the laws of the State of Texas. Effective December 31, 2012, Waterloo Capital Management LLC acquired a controlling interest in Waterloo Capital, L.P. Waterloo Capital Management LLC is a single member limited liability company owned by John Chatmas. Waterloo Capital, L.P., is an SEC-registered investment advisory firm and provides investment advisory services to accomplished entrepreneurs.

Waterloo Capital offers services through our network of investment advisor representatives ("Advisor Representatives" or "IARs"). IARs may have their own legal business entities whose trade names and logos are used for marketing purposes and may appear on marketing materials or client statements. Clients should understand that the businesses are legal entities of the IAR and not of Waterloo Capital. The IARs are under the supervision of Waterloo Capital, and the advisory services of the IAR are provided through Waterloo Capital. Waterloo Capital has the arrangement described above with the following Advisor Representatives:

- AMG Wealth Advisors
- Eberly Wealth Management
- Element Retirement & Investment Consultants
- Hap Neilsen Investments
- Ironclad Strategies
- Lighthouse Financial Advisors
- Market Street
- Strategic Capital

B. Advisory Services Offered

B.1. Investment Management Services

Waterloo Capital offers both direct management services as well as access to third-party sub-advisers.

Clients have the right to provide the firm with any reasonable investment restrictions in writing that should be imposed on the management of their portfolio, and to promptly notify the firm of any changes in such restrictions or in the client's personal financial circumstances, investment objectives, goals and tolerance for risk. Waterloo Capital will remind clients of their obligation to inform the firm of any such changes or any restrictions that should be imposed on the management of the client's account. Waterloo Capital will also contact clients at least annually to determine whether there have been any changes in a client's personal financial circumstances, investment objectives and tolerance for risk.

Retirement Rollovers – Conflicts and Added Fees. Plan participants may be paying little or nothing for the plan's investment services. As such, investment management costs are likely to be higher when engaging an investment adviser for professional investment management. Alternative courses of action are available to the plan participant: (i) Assuming it is permitted by the Plan, you can leave your money in your current Plan. (ii) If you have changed employers, you can roll your assets into the new employer's Plan, if permissible by your new employer. (iii) You can establish an IRA R/O and place into a commission-based account at a broker-dealer. (iv) You can establish an IRA R/O and place into a fee-based advisory account. (v) You can withdraw your retirement money and pay the taxes and any applicable penalties. Your decision to roll assets from a qualified plan to a financial professional should be determined by your need for a desired level of investment services, the associated costs, and access to a diverse range of investment products that meet your personal risk tolerance and investment objective.

B.1.a. Direct Management

Waterloo Capital acts as portfolio managers for the program. The firm works with the client to identify his or her investment goals and objectives as well as risk tolerance in order to create an initial portfolio allocation designed to complement the client's financial situation and personal circumstances. The portfolio may consist of a variety of investments including but not limited to equities, fixed income securities, mutual funds, and alternative investments. The investment strategies utilized depend on the client's investment objectives and goals as provided to the firm. Portfolios are constructed along basic investment objective categories and focus primarily on a long-term buy and hold approach as opposed to short-term trading.

However, each client has the opportunity to place reasonable restrictions on the type of investments to be held in the portfolio. Accounts are managed on a discretionary or non-discretionary basis, at the client's discretion. The advisory representative may periodically rebalance the client's account to maintain the initially agreed upon strategic and tactical asset allocation. However, no changes are made to the agreed-upon asset allocation nor are assets rebalanced in nondiscretionary accounts without prior client review and consent.

B.1.b. Selection of Other Advisers (Sub-Advisers)

As part of its portfolio management services, Waterloo Capital may recommend one or more third-party sub-advisers for all or a portion of the client's investment portfolio. Factors taken into consideration when making recommendations include, but are not limited to, the sub-adviser's performance, investment strategies, methods of analysis, advisory and other fees, assets under management, and the client's financial objectives and risk tolerance. Waterloo Capital would generally retain authority to hire/fire the sub-adviser and regularly monitors the performance of the sub-adviser to ensure its management and investment style remain aligned with the client's objectives and risk tolerance.

Waterloo Capital has a sub-advisory agreement with Intelligent Wealth Solutions LLC, an affiliated registered investment adviser. Waterloo Capital also has sub-advisory agreements with unaffiliated registered investment advisers and platform providers. Waterloo Capital accesses various model portfolio/investment strategies made available through the sub-advisers' platforms. Waterloo Capital determines which portfolios/strategies the client assets

are to be invested in, and thereafter the sub-adviser implements all trades necessary to cause such assets to be invested in the model portfolios and strategies.

Waterloo Capital continuously manages any sub-adviser relationship and regularly monitors the client's account(s) for performance metrics and adherence to the client's investment objectives. Each sub-adviser maintains a separate disclosure document that Waterloo Capital will provide to the client. The client should carefully review the sub-adviser's disclosure document for information regarding fees, risks and investment strategies, and conflicts of interest. The sub-adviser's fee will be in addition to the advisory fees charged by Waterloo Capital.

B.2. Comprehensive Asset Management and Financial Planning Services

Waterloo Capital provides asset management services on a discretionary or non-discretionary basis, per the client's selection. The services encompass asset management, as well as financial planning/financial consulting, and are designed to assist clients in meeting their financial goals through the use of Investments. We will conduct at least one meeting (in person if possible, otherwise via telephone conference) with the client in order to understand income, investments, taxes, insurance, estate plan, financial circumstances, risk tolerances, investment restrictions, goals and objectives. Based on what we learn, we will propose an investment approach to client, which may consist of a variety of types of Investments. Upon the client's agreement to the proposed investment plan, we will work to establish or transfer investment accounts so that we can manage the client's portfolio. Once the accounts are under our management, we review them on a regular basis and at least annually. We may periodically rebalance or adjust the accounts under our management.

Clients have the right to provide the firm with any reasonable investment restrictions that should be imposed on the management of their portfolio, and to promptly notify the firm of any changes in such restrictions or in the client's personal financial circumstances, investment objectives, goals and tolerance for risk. Waterloo Capital will remind clients of their obligation to inform the firm of any such changes or any restrictions that should be imposed on the management of the client's account. Waterloo Capital will also contact clients at least annually to determine whether there have been any changes in a client's personal financial circumstances, investment objectives and tolerance for risk.

B.3. Financial Planning and Consulting Services

Waterloo Capital may prepare and provide the client with a written financial plan designed to help him or her achieve financial goals and investment objectives. The preparation of such a plan may necessitate that the client provide us with personal data such as family records, budgeting, personal liability, estate information, and additional financial goals.

The financial plan may include any or all of the following as requested and/or directed by the client:

- Investment Planning
- Estate Planning
- Retirement Planning
- Family and Business Succession Planning

- Charitable Planning
- Corporate and Personal Tax Planning
- Corporate Structure
- Real Estate Analysis
- Insurance Analysis
- Business and Personal Financial Planning
- Education Planning
- Cost Segregation Study
- Small Business Valuation
- Mortgage/Debt Analysis
- Lines of Credit Evaluation

Should the client choose to implement the recommendations contained in the plan, the firm suggests that the client work closely with his or her attorney, accountant, insurance agent, and/or stockbroker. Implementation of financial plan recommendations is entirely at the client's discretion.

In managing the client's investment portfolio and/or creating your financial plan, Waterloo Capital considers the client's

- financial situation
- risk tolerance
- investment horizon
- liquidity needs
- tax considerations
- investment objectives
- any other issues important to the client's state of affairs

The client is instructed to notify the firm promptly if there are any changes in his or her financial situation or investment objectives, or if the client wishes to impose any reasonable restrictions upon the management of his or her account.

B.4. Educational Seminars/Speaking Engagements

Waterloo Capital hosts educational seminars and speaking engagements for groups seeking general advice on investments and other areas of personal finance. These are offered to organizations and the public on a variety of financial topics. The seminars are purely educational in nature and do not involve the sale of any investment products, or the recommendation of one type of investment over any other type of investment. Information presented will not be based on any individual's need or goals, nor does Advisor provide individualized investment advice to attendees during these seminars.

C. Client-Tailored Services and Client-Imposed Restrictions

Each client's account will be managed on the basis of the client's financial situation and investment objectives and in accordance with any reasonable restrictions imposed by the client on the management of the account—for example, restricting the type or amount of security to be purchased in the portfolio.

D. Wrap Fee Programs

Waterloo Capital offers wrap fee pricing only to clients of AMG Wealth Advisors. In a wrap fee program, clients receive investment advisory services and the execution of securities brokerage transactions for a single specified fee. Participation in a wrap fee program may cost you more or less than purchasing such services separately. We adhere to our fiduciary duty when trading in your accounts. Trades are made only on the basis of the account's stated investment objectives, and without concern to the firm's trading costs and firm's expenses.

Please refer to Appendix 1 of Part 2A: Waterloo Capital Wrap Fee Program Brochure for information. Please see also Item 5.F. of this Brochure for important disclosure regarding custodian investment programs.

E. Client Assets Under Management

As of December 31, 2025, Waterloo Capital had \$2.1 billion of discretionary client assets and \$157.7 million of non-discretionary client assets under management.

Item 5: Fees and Compensation

A. Methods of Compensation and Fee Schedule

A.1. Investment Management & Sub-Adviser Fees

Waterloo Capital offers investment management services on a fee-only basis. The fee is calculated based upon the market value of the assets in the client's account on the last day of the previous quarter. The total managed account fee will include Waterloo Capital's advisory fee (maximum 2.0%, which is negotiable), **plus** a sub-adviser strategy fee/model manager/platform fee if a sub-adviser platform is utilized (sub-adviser's fee portion is non-negotiable). Broker-dealers and other financial institutions that hold client accounts are referred to as custodians ("custodian/ broker-dealer"). The client's custodian/broker-dealer determines the values of the assets in the client's portfolio.

Sub-adviser/strategy/model manager fees vary depending on the platform and model manager/strategy(ies) selected and may change. Clients will be required to approve in writing any model manager/strategy change that results in an increased fee. Please ask your Waterloo Capital professional for a current list of model portfolios and strategies and their costs. In consideration for such services, the sub-adviser will charge a program fee that includes the investment management fee of the strategists, the administration of the program, and trading, clearance and settlement costs. Clients should note that comparable services may be available elsewhere at more favorable pricing. Clients are encouraged to discuss with their financial professional the most appropriate tier of services, given the client's needs and the applicable cost given the client's investment goals and objectives.

Fees for the initial quarter are based on the value of the client's cash and securities on the date the custodian/broker-dealer receives them and are prorated based upon the number of calendar days in the calendar quarter that the investment advisory agreement is in effect.

Under certain circumstances, clients may be charged \$250 per hour for additional services, which may include but are not limited to financial plan implementation, mortgage analysis and refinancing, due diligence of client-introduced investments, and/or working with the client's other advisors. At the discretion of the individual investment adviser representative, for clients with assets under management of \$2,000,000 or more, the firm will, on a quarterly basis, reduce its next quarterly fee in an amount equal to the transaction-based fees incurred by the client during the preceding quarter. Please be advised that the rebate of fees creates an economic disincentive to trade, because every transaction fee that needs to be rebated reduces the firm's profitability. Please also be advised that for clients with less than \$2,000,000 in assets, clients may be able to find comparable services at a lower cost elsewhere.

Investment management fees are subject to the investment advisory agreement between the client and Waterloo Capital, and if a sub-adviser platform is utilized, in the separate Portfolio Confirmation Form clients are required to sign prior to implementation of their portfolio. Such fees are payable quarterly in advance. The client and the client's custodian or broker-dealer will be invoiced at the beginning of each calendar quarter, based upon the market value (market

value plus any credit balance or minus any debit balance) of the client's account at the end of the previous quarter, as mutually agreed upon by the client and Waterloo Capital. While the firm typically does not use margin, if a client utilizes margin leverage, the firm's fees would be billed on the net equity in the portfolio. The fees will be prorated if the investment advisory relationship commences otherwise than at the beginning of a calendar quarter. Adjustments for contributions to and withdrawals from a client's portfolio are prorated for the quarter in which the change occurs.

Trades and balances are included as of trade date, accrued interest is included for fixed income, and the individual security valuations are downloaded directly from the custodian. With respect to private fund valuations, our billing relies on the most recent quarterly valuation statement from the issuer. There may be delays in receiving valuations from an issuer and as a result, valuations for certain issuers may be a full quarter in arrears. Additionally, the firm bills on gross market value provided by the custodian for all margin accounts. The firm utilizes Black Diamond to prorate all contributions and withdrawals. As such, the firm has an incentive to recommend margin over other accounts. The firm has adopted a code of ethics that requires all supervised persons to put clients' interests ahead of their own.

The client authorizes the qualified custodian to automatically deduct the fee and all other charges payable hereunder from the assets in the account when due, with such payments to be reflected on the next account statement sent to the client. If insufficient cash is available to pay such fees, securities in an amount equal to the balance of unpaid fees will be liquidated to pay for the unpaid balance. Waterloo Capital may modify the fee at any time upon 30 days' written notice to the client. In the event the client has an ERISA-governed plan, fee modifications must be approved in writing by the client.

For third-party money managers, a complete description of the programs and services provided, the amount of total fees, the payment structure, termination provisions and other aspects of each program are detailed and disclosed in the following, as applicable:

- Third Party Investment Advisory Service's disclosure documents
- Disclosure documents of the portfolio manager or managers selected
- Third Party Advisory Service's account opening documents

Clients should verify the calculation of Waterloo Capital's fees. The client's custodian/broker-dealer does not verify the accuracy of fee calculations.

A client investment advisory agreement may be canceled at any time by the client, or by Waterloo Capital with 30 days' prior written notice to the client. Upon termination of any account, any unearned, prepaid fees will be promptly refunded. The client has the right to terminate an agreement without penalty within five business days after entering into the agreement.

A.1.a. Wrap vs. Non-Wrap Program Fees

Please be advised that non-wrap program fees (those where the client pays trading costs in addition to the advisory fee) should, all things being equal, have the same overall net cost to the client as a comparable investment account in a wrap fee program. For example, if a client

has a \$100,000 investment account and utilizes a non-wrap program for an advisory fee of 1% and pays \$250 in additional trading costs, a comparable arrangement on a wrap fee program basis (where the advisory fees include both the trading costs and advisory fee) would be 1.25%. In this way, the client understands the concept of fee parity when comparing wrap vs. non-wrap fee programs. In other words, if you're comparing a non-wrap program at 2% to a wrap free program at 2%, it would always be in your best interest to use the wrap fee in this example. This is not to suggest that actual trading may be more or less active, which could influence the use of a non-wrap program versus a wrap fee program. As a result, it is important to understand that the firm has an economic incentive to trade infrequently within a wrap fee program because frequent trading lowers the firm's profitability. Of course, it is your decision to utilize the specific fee arrangement and this disclosure is to help you understand the relationship between the cost components of non-wrap fee programs versus wrap fee programs and the related conflicts of interest.

A.2. Comprehensive Asset Management and Financial Planning

The Comprehensive Asset Management and Financial Planning fee between the firm and the client is negotiated before the contract is signed.

Asset-based fees are always subject to the investment advisory agreement between the client and Waterloo Capital. Such fees are payable quarterly in advance. The client and the client's custodian or broker-dealer will be invoiced at the beginning of each calendar quarter, based upon the market value (market value plus any credit balance or minus any debit balance) of the client's account at the end of the previous quarter, as mutually agreed upon by the client and Waterloo Capital. The fees will be prorated if the investment advisory relationship commences otherwise than at the beginning of a calendar quarter. Adjustments for contributions to and distributions from a client's portfolio are prorated for the quarter in which the change occurs.

Either party may terminate the agreement in writing at any time. Upon notice of termination, Waterloo Capital will process a pro-rata refund of the unearned portion of the advisory fees charged in advance at the beginning of the quarter.

A.3. Financial Planning and Consulting Fees

Financial planning and consulting services are charged through either an hourly or fixed fee arrangement as agreed upon between the client and Waterloo Capital. The financial planning fee between the firm and the client is negotiated before the contract is signed.

Clients may select a one-time fee or an ongoing fee for services. One-time fees may be payable in full upon execution of the agreement, an initial payment with the remainder directly invoice and due within 30 days, or payment in full upon delivery of services. For ongoing services, the service will automatically renew annually until canceled by either party. Clients will be either directly invoiced or fees will be deducted from their managed accounts, per the agreement.

A financial planning agreement may be terminated by either party for any reason upon receipt of written notice. Upon termination of any account, any unearned, prepaid fees will be promptly refunded and any earned, unpaid fees will be immediately due and payable. The client has the

right to terminate an agreement without penalty within five business days after entering into the agreement.

A.4. Educational Seminars/Speaking Engagements Fees

Fees for this service may be billed a fixed fee ranging from \$1,000 - \$50,000 per seminar, based on an hourly fee of \$500. The fee range is based on the content, amount of research conducted, the number of hours of preparation needed, and the number of attendees. Fees are negotiable and may be waived by Waterloo Capital in its sole discretion.

Waterloo Capital offers its services in a virtual or in-person setting. Should the event require travel arrangements, both parties must agree to the terms of travel (i.e. cost, distance, hotel arrangements) at the start of the engagement.

B. Client Payment of Fees

B.1. Investment Management & Sub-Adviser Fees

Waterloo Capital will deduct advisory fees directly from the client's account provided that (i) the client provides written authorization to the qualified custodian, and (ii) the qualified custodian sends the client a statement, at least quarterly, indicating all amounts disbursed from the account. At our discretion, you may be billed for fees in lieu of having them debited from the account.

The client is responsible for verifying the accuracy of the fee calculation, as the client's custodian will not verify the calculation.

B.1.a. Rebate of Fees

Waterloo Capital will send a quarterly billing statement detailing the total transaction fee rebates that were deducted from the client's quarterly management fee.

B.2. Financial Planning Fees

A 50% retainer fee for one-time financial planning services is due at inception of engagement and the remainder is paid at delivery. The financial plan will be presented to the client within 90 days of the contract date, provided that the client has promptly provided all information needed to prepare the financial plan.

B.3. Educational Seminars/Speaking Engagement Fees

Half of the fees are due prior to the engagement, and the other half is to be paid the day of, no later than the conclusion of the seminar. Fees for this service may be paid by electronic funds transfer or check. At no time do we require prepayment of \$500 or more six months or more in advance of rendering the services.

Client may cancel the event with 30 days' advance written notice without penalty. Waterloo Capital will provide a refund of any fees collected in advance. Should the client cancel the event within 30 days of the event (with the exception of weather or similar unforeseen causes), the

client will be responsible for reimbursement of any non-refundable travel expenses already incurred and a prorated fee for any work conducted in preparation of the event, based on the percentage of work done and the flat fee agreed upon by both parties. Should any fees collected in advance exceed the amount of work conducted, Waterloo Capital will provide a prorated refund based on \$500 per hour for the work completed subtracted from the advance fee collected.

C. Additional Client Fees Charged

All fees paid for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds, sub-advisers, broker-dealers and custodians retained by clients. Such fees and expenses are described in each mutual fund's prospectus, each sub-adviser's Form ADV or similar disclosure statement, and by any broker-dealer or custodian retained by the client. Clients are advised to read these materials carefully before investing. If a fund also imposes sales charges, a client may pay an initial or deferred sales charge as further described in the mutual fund's prospectus. A client using Waterloo Capital may be precluded from using certain mutual funds or separate account managers because they may not be offered by the client's custodian.

Please refer to the Brokerage Practices section (Item 12) for additional information regarding the firm's brokerage practices.

D. Prepayment of Client Fees

Waterloo Capital requires the prepayment of its advisory fees. The firm's fees will either be paid directly by the client or disbursed to Waterloo Capital by the qualified custodian of the client's investment accounts, subject to prior written consent of the client. The custodian will deliver directly to the client an account statement, at least quarterly, showing all investment and transaction activity for the period, including fee disbursements from the account.

A 50% retainer fee for one-time financial planning services is due at inception of engagement and the remainder is paid at delivery.

A client investment advisory agreement may be canceled at any time by the client, or by Waterloo Capital with 30 days' prior written notice to the client. An agreement may be terminated by either party for any reason upon receipt of written notice. Upon termination of any account, any unearned, prepaid fees will be promptly refunded and any earned, unpaid fees will be immediately due and payable. The client has the right to terminate an agreement without penalty within five business days after entering into the agreement.

E. External Compensation for the Sale of Securities to Clients

Waterloo Capital's advisory professionals are paid a percentage of the asset-based advisory fees pursuant to their payout arrangement with Waterloo Capital. Waterloo Capital's advisory professionals may be paid sales, service or administrative fees for the sale of mutual funds or other investment products in their capacity as registered representatives of a broker-dealer.

Waterloo Capital's advisory professionals may receive commission-based compensation for the sale of securities and insurance products. Investment adviser representatives, in their capacity as broker-dealer registered representative, are prohibited from earning an advisory fee on the securities value transferred from an advisory client's brokerage account unless commissions earned on such securities transactions occurred at least 12 months prior to the transfer. Please see Item 10.C. for conflicts of interest.

F. Important Disclosure – Custodian Investment Programs

Please be advised that certain of the firm's investment adviser representatives are registered with a broker-dealer and/or the firm is a broker-dealer or affiliated with a broker-dealer. Under these arrangements, we can access certain investment programs offered through the broker-dealer that offer certain compensation and fee structures that create conflicts of interest of which clients need to be aware. As such, the investment adviser representative and/or the firm may have an economic incentive to recommend the purchase of 12b-1 or revenue share class mutual funds offered through the broker-dealer platform rather than from the investment adviser platform.

Limitation on Mutual Fund Universe for Custodian Investment Programs: Please note that as a matter of policy we prohibit the receipt of revenue share fees from any mutual funds utilized for our advisory clients' portfolios. There are certain programs in which we participate where a client's investment options may be limited in certain of these programs to those mutual funds and/or mutual fund share classes that pay 12b-1 fees and other revenue sharing fee payments, and the client should be aware that the firm is not selecting from among all mutual funds available in the marketplace when recommending mutual funds to the client.

Conflict Between Revenue Share Class (12b-1) and Non-Revenue Share Class Mutual Funds: Revenue share class/12b-1 fees are deducted from the net asset value of the mutual fund and generally, all things being equal, cause the fund to earn lower rates of return than those mutual funds that do not pay revenue sharing fees. The client is under no obligation to utilize such programs or mutual funds. Although many factors will influence the type of fund to be used, the client should discuss with their investment adviser representative whether a share class from a comparable mutual fund with a more favorable return to investors is available that does not include the payment of any 12b-1 or revenue sharing fees given the client's individual needs and priorities and anticipated transaction costs. In addition, the receipt of such fees can create conflicts of interest in instances (i) where our adviser representative is also licensed as a registered representative of a broker-dealer and receives a portion of 12b-1 and or revenue sharing fees as compensation – such compensation creates an incentive for the investment adviser representative to use programs which utilize funds that pay such additional compensation; and (ii) where the custodian receives the entirety of the 12b-1 and/or revenue sharing fees and takes the receipt of such fees into consideration in terms of benefits it may elect to provide to the firm, even though such benefits may or may not benefit some or all of the firm clients.

Additional Disclosure Concerning Wrap Programs: To the extent that we either sponsor or recommend wrap fee programs, please be advised that certain wrap fee programs may (i) allow

our investment adviser representatives to select mutual fund classes that either have no transaction fee costs associated with them but include embedded 12b-1 fees that lower the investor's return ("sometimes referred to as "A-Shares," depending on the mutual fund issuer), or (ii) allow the use of mutual fund classes that have transaction fees associated with them but do not carry embedded 12b-1 fees (sometimes referred to as "I-Shares," depending on the mutual fund sponsor). Wrap fee programs offer investment services and related transaction services for one all-inclusive fee (except as may be described in the applicable wrap fee program brochure). The trading costs are typically absorbed by the firm and/or the investment representative. If a client's account holds A-Shares within a wrap fee program, the firm and/or its investment adviser representative avoids paying the transaction fees charged by other mutual fund classes, which in effect decreases the firm's costs and increases its revenues from the account. Effectively, the cost is transferred to the client from the firm in the form of a lower rate of return on the specific mutual fund. This creates an incentive for the firm or investment adviser representative to utilize such funds as opposed to those funds that may be equally appropriate for a client but do not carry the additional cost of 12b-1 fees. As a policy matter, the firm does not allow funds that impose 12b-1 or revenue sharing fees on the client's investment within its wrap fee programs. Clients should understand and discuss with their investment adviser representative the types of mutual fund share classes available in the wrap fee program and the basis for using one share class over another in accordance with their individual circumstances and priorities.

Item 6: Performance-Based Fees and Side-by-Side Management

Waterloo Capital does not charge performance-based fees and therefore has no economic incentive to manage clients' portfolios in any way other than what is in their best interests.

Item 7: Types of Clients

Waterloo Capital provides advisory services primarily to individuals and high-net-worth individuals, trusts, estates, retirement accounts, pension and profit sharing plans, charitable organizations, corporations, and other business entities. As a condition for starting and maintaining an advisory relationship, the firm generally require a minimum portfolio size of \$1,000,000. The firm, at its sole discretion, may accept clients with smaller portfolios based upon certain factors including anticipated future earning capacity, anticipated future additional assets, account composition, related accounts, and pre-existing client relationships. The firm may consider the portfolios of the client's family members to determine if the portfolio meets the minimum size requirement.

Item 8: Methods of Analysis, Investment Strategies, and Risk of Loss

A. Methods of Analysis and Investment Strategies

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear. There is no guarantee that any specific investment or strategy will be profitable for a particular client.

A.1. Methods of Analysis

Waterloo Capital selects specific investments for client portfolios through the use of fundamental analysis. Fundamental analysis is a method of evaluating a company that has issued a security by attempting to measure the value of its underlying assets. It entails studying overall economic and industry conditions as well as the financial condition and the quality of the company's management. Earnings, expenses, assets, and liabilities are all important in determining the value of a company. The value is then compared to the current price of the issuing company's security to determine whether to purchase, sell, or hold the security.

A.2. Important Disclosure – Custodian Investment Programs

Please be advised that the firm utilizes certain custodians/broker-dealers. Under these arrangements we can access certain investment programs offered by our custodian that offer certain compensation and fee structures that create conflicts of interest of which clients need to be aware. Please see Item 5.A. of this Brochure for detailed information.

A.3. Mutual Funds and Exchange-Traded Funds, Individual Equity and Fixed Income Securities, Third-Party Sub-Advisers and Pooled Investment Vehicles

Waterloo Capital may recommend "institutional share class" mutual funds, exchange-traded funds ("ETFs"), individual securities (including fixed income instruments), and pooled investment vehicles.

Waterloo Capital may also assist the client in selecting one or more appropriate sub-advisers for all or a portion of the client's portfolio. Such sub-advisers will typically manage assets for clients who commit to the manager a minimum amount of assets established by that sub-adviser—a factor that Waterloo Capital will take into account when recommending sub-advisers to clients. Waterloo Capital's selection process cannot ensure that sub-advisers will perform as desired, and Waterloo Capital will have no control over the day-to-day operations of any of its selected sub-advisers. Waterloo Capital would not necessarily be aware of certain activities at the underlying sub-adviser's level, including without limitation a sub-adviser's engaging in unreported risks, investment "style drift," or even regulatory breaches or fraud.

A description of the criteria to be used in formulating an investment recommendation for mutual funds, ETFs, individual securities (including fixed-income securities), sub-advisers, and pooled investment vehicles is set forth below.

The firm has formed relationships with third-party vendors that

- provide a technological platform for separate account management

- prepare performance reports
- perform due diligence monitoring of mutual funds, managers and pooled investment vehicles
- perform billing and certain other administrative tasks

The firm may utilize additional independent third parties to assist it in recommending and monitoring individual securities, funds, sub-advisers, and pooled investment vehicles to clients as appropriate under the circumstances.

The firm reviews certain quantitative and qualitative criteria related to funds and sub-advisers and to formulate investment recommendations to its clients. Quantitative criteria may include

- performance history of a fund or sub-adviser evaluated against that of its peers and other benchmarks
- analysis of risk-adjusted returns
- analysis of the contribution to the investment return (e.g., manager's alpha), standard deviation of returns over specific time periods, sector and style analysis
- fund or sub-adviser's fee structure
- relevant portfolio manager's tenure

Qualitative criteria used in selecting/recommending funds or sub-advisers include the investment objectives and/or management style and philosophy of a fund or sub-adviser; a mutual fund or sub-adviser's consistency of investment style; and employee turnover and efficiency and capacity.

Quantitative and qualitative criteria related to funds and sub-advisers are reviewed by Waterloo Capital on a quarterly basis or such other interval as appropriate under the circumstances. In addition, funds or sub-advisers are reviewed to determine the extent to which their investments reflect any of the following: efforts to time the market, engage in portfolio pumping, or evidence style drift such that their portfolios no longer accurately reflect the particular asset category attributed to the fund or sub-adviser by Waterloo Capital (all negative factors in implementing an asset allocation structure).

Waterloo Capital may negotiate reduced account minimum balances and reduced fees with sub-advisers under various circumstances (e.g., for clients with minimum level of assets committed to the manager for specific periods of time, etc.). There can be no assurance that clients will receive any reduced account minimum balances or fees, or that all clients, even if apparently similarly situated, will receive any reduced account minimum balances or fees available to some other clients. Also, account minimum balances and fees may significantly differ between clients. Each client's individual needs and circumstances will determine portfolio weighting, which can have an impact on fees given the funds or sub-advisers utilized. Waterloo Capital will endeavor to obtain equal treatment for its clients with funds or sub-advisers, but cannot assure equal treatment.

Waterloo Capital will regularly review the activities of funds and sub-advisers utilized for the client. Clients that engage sub-advisers or invest in funds should first review and understand the disclosure documents of those sub-advisers or funds, which contain information relevant to such

retention or investment, including information on the methodology used to analyze securities, investment strategies, fees and conflicts of interest. Similarly, clients qualified to invest in pooled investment vehicles should review the private placement memoranda or other disclosure materials relating to such vehicles before making a decision to invest.

A.4. Material Risks of Investment Instruments

The investment vehicles most commonly purchased for the firm's clients are shares of registered open-end mutual funds and exchange traded funds. Many of these investments can be purchased directly by clients without utilizing the services of an advisor. Registered investment companies charge their own management fees and expenses. These fees and expenses are detailed in each respective mutual fund's prospectus and are in addition to any fees charged by Waterloo Capital.

Waterloo Capital typically invests in open-end mutual funds and exchange-traded funds for the vast majority of its clients. However, for certain clients, the firm may effect transactions in the following types of securities:

- Equity securities
- Warrants and rights
- Mutual fund securities
- Exchange-traded funds
- Fixed income securities
- Corporate debt securities, commercial paper, and certificates of deposit
- Municipal securities
- U.S. government securities
- Private placements
- Pooled investment vehicles
- Structured products
- Government and agency mortgage-backed securities
- Corporate debt obligations
- Mortgage-backed securities
- Asset-backed securities
- Collateralized obligations

A.4.a. Equity Securities

Investing in individual companies involves inherent risk. The major risks relate to the company's capitalization, quality of the company's management, quality and cost of the company's services, the company's ability to manage costs, efficiencies in the manufacturing or service delivery process, management of litigation risk, and the company's ability to create shareholder value (i.e., increase the value of the company's stock price). Foreign securities, in addition to the general risks of equity securities, have geopolitical risk, financial transparency risk, currency risk, regulatory risk and liquidity risk.

A.4.b. Warrants and Rights

Warrants are securities, typically issued with preferred stock or bonds that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price of the warrant usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends and have no rights with respect to the assets of the issuer.

Investments in warrants and rights involve certain risks, including the possible lack of a liquid market for the resale of the warrants and rights, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

A.4.c. Mutual Fund Securities

Investing in mutual funds carries inherent risk. The major risks of investing in a mutual fund include the quality and experience of the portfolio management team and its ability to create fund value by investing in securities that have positive growth, the amount of individual company diversification, the type and amount of industry diversification, and the type and amount of sector diversification within specific industries. In addition, mutual funds tend to be tax inefficient and therefore investors may pay capital gains taxes on fund investments while not having yet sold the fund.

A.4.d. Exchange-Traded Funds ("ETFs")

ETFs are investment companies whose shares are bought and sold on a securities exchange. An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDRs[®], streetTRACKS[®], DIAMONDSSM, NASDAQ 100 Index Tracking StockSM ("QQQsSM") iShares[®] and VIPERs[®]. The funds could purchase an ETF to gain exposure to a portion of the U.S. or foreign market.

The funds, as a shareholder of another investment company, will bear their pro-rata portion of the other investment company's advisory fee and other expenses, in addition to their own expenses.

Investing in ETFs involves risk. Specifically, ETFs, depending on the underlying portfolio and its size, can have wide price (bid and ask) spreads, thus diluting or negating any upward price movement of the ETF or enhancing any downward price movement. Also, ETFs require more frequent portfolio reporting by regulators and are thereby more susceptible to actions by hedge funds that could have a negative impact on the price of the ETF. Certain ETFs may employ leverage, which creates additional volatility and price risk depending on the amount of leverage utilized, the collateral and the liquidity of the supporting collateral.

Further, the use of leverage (i.e., employ the use of margin) generally results in additional interest costs to the ETF. Certain ETFs are highly leveraged and therefore have additional volatility and liquidity risk. Volatility and liquidity can severely and negatively impact the price

of the ETF's underlying portfolio securities, thereby causing significant price fluctuations of the ETF.

A.4.e. Fixed Income Securities

Fixed income securities carry additional risks than those of equity securities described above. These risks include the company's ability to retire its debt at maturity, the current interest rate environment, the coupon interest rate promised to bondholders, legal constraints, jurisdictional risk (U.S or foreign) and currency risk. If bonds have maturities of 10 years or greater, they will likely have greater price swings when interest rates move up or down. The shorter the maturity the less volatile the price swings. Foreign bonds have liquidity and currency risk.

A.4.f. Corporate Debt, Commercial Paper and Certificates of Deposit

Fixed income securities carry additional risks than those of equity securities described above. These risks include the company's ability to retire its debt at maturity, the current interest rate environment, the coupon interest rate promised to bondholders, legal constraints, jurisdictional risk (U.S or foreign) and currency risk. If bonds have maturities of 10 years or greater, they will likely have greater price swings when interest rates move up or down. The shorter the maturity the less volatile the price swings. Foreign bonds also have liquidity and currency risk.

Commercial paper and certificates of deposit are generally considered safe instruments, although they are subject to the level of general interest rates, the credit quality of the issuing bank and the length of maturity. With respect to certificates of deposit, depending on the length of maturity there can be pre-payment penalties if the client needs to convert the certificate of deposit to cash prior to maturity.

A.4.g. Municipal Securities

Municipal securities carry additional risks than those of corporate and bank-sponsored debt securities described above. These risks include the municipality's ability to raise additional tax revenue or other revenue (in the event the bonds are revenue bonds) to pay interest on its debt and to retire its debt at maturity. Municipal bonds are generally tax free at the federal level, but may be taxable in individual states other than the state in which both the investor and municipal issuer is domiciled.

A.4.h. U.S. Government Securities

U.S. government securities include securities issued by the U.S. Treasury and by U.S. government agencies and instrumentalities. U.S. government securities may be supported by the full faith and credit of the United States.

A.4.i. Private Placements

Private placements carry significant risk in that companies using the private placement market conduct securities offerings that are exempt from registration under the federal securities laws, which means that investors do not have access to public information and such investors are

not provided with the same amount of information that they would receive if the securities offering was a public offering. Moreover, many companies using private placements do so to raise equity capital in the start-up phase of their business, or require additional capital to complete another phase in their growth objective. In addition, the securities issued in connection with private placements are restricted securities, which means that they are not traded on a secondary market, such as a stock exchange, and they are thus illiquid and cannot be readily converted to cash.

A.4.j. Pooled Investment Vehicles

A pooled investment vehicle, such as a commodity pool or investment company, is generally offered only to investors who meet specified suitability, net worth and annual income criteria. Pooled investment vehicles sell securities through private placements and thus are illiquid and subject to a variety of risks that are disclosed in each pooled investment vehicle's confidential private placement memorandum or disclosure document. Investors should read these documents carefully and consult with their professional advisors prior to committing investment dollars. Because many of the securities involved in pooled investment vehicles do not have transparent trading markets from which accurate and current pricing information can be derived, or in the case of private equity investments where portfolio security companies are privately held with no publicly traded market, PDIV will be unable to monitor or verify the accuracy of such performance information.

A.4.k. Structured Products

Structured products are designed to facilitate highly customized risk-return objectives. While structured products come in many different forms, they typically consist of a debt security that is structured to make interest and principal payments based upon various assets, rates or formulas. Many structured products include an embedded derivative component. Structured products may be structured in the form of a security, in which case these products may receive benefits provided under federal securities law, or they may be cast as derivatives, in which case they are offered in the over-the-counter market and are subject to no regulation.

Investment in structured products includes significant risks, including valuation, liquidity, price, credit and market risks. One common risk associated with structured products is a relative lack of liquidity due to the highly customized nature of the investment. Moreover, the full extent of returns from the complex performance features is often not realized until maturity. As such, structured products tend to be more of a buy-and-hold investment decision rather than a means of getting in and out of a position with speed and efficiency.

Another risk with structured products is the credit quality of the issuer. Although the cash flows are derived from other sources, the products themselves are legally considered to be the issuing financial institution's liabilities. The vast majority of structured products are from high investment grade issuers only. Also, there is a lack of pricing transparency. There is no uniform standard for pricing, making it harder to compare the net-of-pricing attractiveness of alternative structured product offerings than it is, for instance, to compare the net expense ratios of different mutual funds or commissions among broker-dealers.

A.4.I. Government and Agency Mortgage-Backed Securities

The principal issuers or guarantors of mortgage-backed securities are the Government National Mortgage Association (“GNMA”), Fannie Mae (“FNMA”) and the Federal Home Loan Mortgage Corporation (“FHLMC”). GNMA, a wholly owned U.S. government corporation within the Department of Housing and Urban Development (“HUD”), creates pass-through securities from pools of government-guaranteed (Farmers’ Home Administration, Federal Housing Authority or Veterans Administration) mortgages. The principal and interest on GNMA pass-through securities are backed by the full faith and credit of the U.S. government.

FNMA, which is a U.S. government-sponsored corporation owned entirely by private stockholders that is subject to regulation by the secretary of HUD, and FHLMC, a corporate instrumentality of the U.S. government, issue pass-through securities from pools of conventional and federally insured and/or guaranteed residential mortgages. FNMA guarantees full and timely payment of all interest and principal, and FHMLC guarantees timely payment of interest and ultimate collection of principal of its pass-through securities. Mortgage-backed securities from FNMA and FHLMC are *not* backed by the full faith and credit of the U.S. government.

A.4.m. Corporate Debt Obligations

Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. Companies use these instruments to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must repay the amount borrowed at maturity. Commercial paper (short-term unsecured promissory notes) is issued by companies to finance their current obligations and normally has a maturity of less than nine months. In addition, the firm may also invest in corporate debt securities registered and sold in the United States by foreign issuers (Yankee bonds) and those sold outside the U.S. by foreign or U.S. issuers (Eurobonds).

A.4.n. Mortgage-Backed Securities

Mortgage-backed securities represent interests in a pool of mortgage loans originated by lenders such as commercial banks, savings associations, and mortgage bankers and brokers. Mortgage-backed securities may be issued by governmental or government-related entities, or by non-governmental entities such as special-purpose trusts created by commercial lenders.

Pools of mortgages consist of whole mortgage loans or participations in mortgage loans. The majority of these loans are made to purchasers of between one and four family homes. The terms and characteristics of the mortgage instruments are generally uniform within a pool but may vary among pools. For example, in addition to fixed-rate, fixed-term mortgages, PDIV may purchase pools of adjustable-rate mortgages, growing equity mortgages, graduated payment mortgages and other types. Mortgage poolers apply qualification standards to lending institutions, which originate mortgages for the pools as well as credit standards and underwriting criteria for individual mortgages included in the pools. In addition, many mortgages included in pools are insured through private mortgage insurance companies.

Mortgage-backed securities differ from other forms of fixed income securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or on specified call dates. Most mortgage-backed securities, however, are pass-through securities, which means that investors receive payments consisting of a pro rata share of both principal and interest (less servicing and other fees), as well as unscheduled prepayments as loans in the underlying mortgage pool are paid off by the borrowers. Additional prepayments to holders of these securities are caused by prepayments resulting from the sale or foreclosure of the underlying property or refinancing of the underlying loans. As prepayment rates of individual pools of mortgage loans vary widely, it is not possible to accurately predict the average life of a particular mortgage-backed security. Although mortgage-backed securities are issued with stated maturities of up to 40 years, unscheduled or early payments of principal and interest on the mortgages may shorten considerably the securities' effective maturities.

A.4.o. Asset-Backed Securities

Like mortgages-backed securities, the collateral underlying asset-backed securities are subject to prepayment, which may reduce the overall return to holders of asset-backed securities. Asset-backed securities present certain additional and unique risks. Primarily, these securities do not always have the benefit of a security interest in collateral comparable to the security interests associated with mortgage-backed securities. Credit card receivables are in general unsecured. Debtors are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set-off certain amounts owed on the credit cards, thereby reducing the balance due.

Generally, automobile receivables are secured by automobiles. Most issuers of automobile receivables permit the loan servicers to retain possession of the underlying obligations. If the servicer were to sell these obligations to another party, there is a risk that the purchaser would acquire an interest superior to that of the holders of the asset-backed securities. In addition, because of the large number of vehicles involved in a typical issuance and the technical requirements under state laws, the trustee for the holders of the automobile receivables may not have a proper security interest in the underlying automobiles. As a result, the risk that recovery on repossessed collateral might be unavailable or inadequate to support payments on asset-backed securities is greater for asset-backed securities than for mortgage-backed securities. In addition, because asset-backed securities are relatively new, the market experience in these securities is limited and the market's ability to sustain liquidity through all phases of an interest rate or economic cycle has not been tested.

A.4.p. Collateralized Obligations

Collateralized mortgage obligations ("CMOs") are collateralized by mortgage-backed securities issued by GNMA, FHLMC or FNMA ("mortgage assets"). CMOs are multiple-class debt obligations. Payments of principal and interest on the mortgage assets are passed through to the holders of the CMOs as they are received, although certain classes (often referred to as "tranches") of CMOs have priority over other classes with respect to the receipt of mortgage prepayments. Each tranche is issued at a specific or floating coupon rate and has a stated maturity or final distribution date. Interest is paid or accrues in all tranches on a

monthly, quarterly or semi-annual basis. Payments of principal and interest on mortgage assets are commonly applied to the tranches in the order of their respective maturities or final distribution dates, so that generally no payment of principal will be made on any tranche until all other tranches with earlier stated maturity or distribution dates have been paid in full.

Collateralized debt obligations ("CDOs") include collateralized bond obligations ("CBOs"), collateralized loan obligations ("CLOs") and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust that is backed by a diversified pool of high-risk, below-investment-grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans.

B. Investment Strategy and Method of Analysis Material Risks

Waterloo Capital's investment strategy is custom-tailored to the client's goals, investment objectives, risk tolerance, and personal and financial circumstances.

B.1. Margin Leverage

Although the firm, as a general business practice, does not utilize leverage, there may be instances in which exchange-traded funds, other separate account managers and, in very limited circumstances, the firm will utilize leverage. In this regard please review the following:

The use of margin leverage enhances the overall risk of investment gain and loss to the client's investment portfolio. For example, investors are able to control \$2 of a security for \$1. So if the price of a security rises by \$1, the investor earns a 100% return on their investment. Conversely, if the security declines by \$.50, then the investor loses 50% of their investment.

The use of margin leverage entails borrowing, which results in additional interest costs to the investor.

Broker-dealers who carry customer accounts require a minimum equity requirement when clients utilize margin leverage. The minimum equity requirement is stated as a percentage of the value of the underlying collateral security with an absolute minimum dollar requirement. For example, if the price of a security declines in value to the point where the excess equity used to satisfy the minimum requirement dissipates, the broker-dealer will require the client to deposit additional collateral to the account in the form of cash or marketable securities. A deposit of securities to the account will require a larger deposit, as the security being deposited is included in the computation of the minimum equity requirement. In addition, when leverage is utilized and the client needs to withdraw cash, the client must sell a disproportionate amount of collateral securities to release enough cash to satisfy the withdrawal amount based upon similar reasoning as cited above.

Regulations concerning the use of margin leverage are established by the Federal Reserve Board and vary if the client's account is held at a broker-dealer versus a bank custodian. Broker-dealers and bank custodians may apply more stringent rules as they deem necessary.

B.2. Short-Term Trading

Although the firm, as a general business practice, does not utilize short-term trading, there may be instances in which short-term trading may be necessary or an appropriate strategy. In this regard, please read the following:

There is an inherent risk for clients who trade frequently in that high-frequency trading creates substantial transaction costs that in the aggregate could negatively impact account performance.

B.3. Short Selling

The firm generally does not engage in short selling but reserves the right to do so in the exercise of its sole judgment. Short selling involves the sale of a security that is borrowed rather than owned. When a short sale is effected, the investor is expecting the price of the security to decline in value so that a purchase or closeout of the short sale can be effected at a significantly lower price. The primary risks of effecting short sales is the availability to borrow the stock, the unlimited potential for loss, and the requirement to fund any difference between the short credit balance and the market value of the security.

B.4. Technical Trading Models

Technical trading models are mathematically driven based upon historical data and trends of domestic and foreign market trading activity, including various industry and sector trading statistics within such markets. Technical trading models, through mathematical algorithms, attempt to identify when markets are likely to increase or decrease and identify appropriate entry and exit points. The primary risk of technical trading models is that historical trends and past performance cannot predict future trends, and there is no assurance that the mathematical algorithms employed are designed properly, updated with new data, and can accurately predict future market, industry, and sector performance.

B.5. Option Strategies

Various option strategies give the holder the right to acquire or sell underlying securities at the contract strike price up until expiration of the option. Each contract is worth 100 shares of the underlying security. Options entail greater risk but allow an investor to have market exposure to a particular security or group of securities without the capital commitment required to purchase the underlying security or groups of securities. In addition, options allow investors to hedge security positions held in the portfolio. For detailed information on the use of options and option strategies, please contact the Options Clearing Corporation for the current Options Risk Disclosure Statement.

Waterloo Capital as part of its investment strategy may employ the following option strategies:

- Covered call writing
- Long call options purchases
- Long put options purchases
- Option spreading

- Short call option strategy
- Short put option strategy
- Equity collars
- Long straddles
- Index-based options

B.5.a. Covered Call Writing

Covered call writing is the sale of in-, at-, or out-of-the money call option against a long security position held in the client portfolio. This type of transaction is used to generate income. It also serves to create downside protection in the event the security position declines in value. Income is received from the proceeds of the option sale. Such income may be reduced to the extent it is necessary to buy back the option position prior to its expiration. This strategy may involve a degree of trading velocity, transaction costs and significant losses if the underlying security has volatile price movement. Covered call strategies are generally suited for companies with little price volatility.

B.5.b. Long Call Option Purchases

Long call option purchases allow the option holder to be exposed to the general market characteristics of a security without the outlay of capital necessary to own the security. Options are wasting assets and expire (usually within nine months of issuance), and as a result can expose the investor to significant loss.

B.5.c. Long Put Option Purchases

Long put option purchases allow the option holder to sell or “put” the underlying security at the contract strike price at a future date. If the price of the underlying security declines in value, the value of the long put option increases. In this way long puts are often used to hedge a long stock position. Options are wasting assets and expire (usually within nine months of issuance), and as a result can expose the investor to significant loss.

B.5.d. Option Spreading

Option spreading usually involves the purchase of a call option and the sale of a call option at a higher contract strike price, both having the same expiration month. The purpose of this type of transaction is to allow the holder to be exposed to the general market characteristics of a security without the outlay of capital to own the security, and to offset the cost by selling the call option with a higher contract strike price. In this type of transaction, the spread holder “locks in” a maximum profit, defined as the difference in contract prices reduced by the net cost of implementing the spread. There are many variations of option spreading strategies; please contact the Options Clearing Corporation for a current Options Risk Disclosure Statement that discusses each of these strategies.

B.5.e. Short Call Option Strategy

Short call option strategy is highly speculative and has theoretical potential for unlimited loss. The seller (writer) of the call option receives proceeds (premium) from the sale of the option. The expectation is that the value of the underlying security will remain below the contract strike price and the option will expire worthless, allowing the option writer to keep the entire amount of the sale proceeds (premium). Should the value of the underlying security increase above the contract strike price, then the option writer can either purchase the call option at a loss, or through a process of exercise and assignment be forced to sell the stock at the contract strike price. If this happens, the option writer will have to go in the open market and buy an equivalent amount of stock to cover the sale at prices that can be materially higher than the amount received from the sale.

B.5.f. Short Put Option Strategy

Short put option strategy is highly speculative and has theoretical potential for significant loss. The seller (writer) of the put option receives proceeds (premium) from the sale of the option. The expectation is that the value of the underlying security will remain above the contract strike price and the option will expire worthless, allowing the option writer to keep the entire amount of the sale proceeds (premium). Should the value of the underlying security decrease below the contract strike price, the option writer can either purchase the put option at a loss, or through a process of exercise and assignment be forced to buy the stock at the contract strike price. If this happens, the option writer will be purchasing the underlying security at a price potentially well above its then-current market value, exposing the investor to potential loss.

B.5.g. Equity Collar

A collar combines both a cap and a floor. A cap gives the purchaser of the cap the right (for a premium payment), but not the obligation, to receive the difference in the cost on some amount when a specified index rises above the specified "cap rate." A floor is the opposite of a cap—it gives the purchaser of the floor the right (for a premium payment), but not the obligation, to receive the difference in interest payable on an amount when a specified index falls below the specified "floor rate." A collar involving stock is called an "equity collar." In a collar transaction, the buyer of the collar purchases a cap while selling a floor indexed to the same rate or asset. A zero-cost collar results when the premium earned by selling a floor exactly offsets the cap premium.

B.5.h. Long Straddle

A long straddle is the purchase of a long call and a long put with the same underlying security, expiration date and strike price. This is a speculative trade that may be profitable when volatility is high and will result in a loss when prices of the underlying security are relatively stable.

B.5.i. Index-Based Options

Index-based options are put and call options based on the value of an underlying index and are appropriate only for sophisticated and experienced investors who have the financial and emotional means to assume a high degree of risk. Index options, such as those tied to the S&P 500® index (SPX) or Nasdaq-100® (NDX), allow investors to hedge or speculate on macro market and economic trends. These options are settled in cash and tend to be less volatile than options on a single stock because the underlying asset represents a diversified basket of stocks. Most index options are European style, meaning they can't be exercised before expiration which mitigates assignment risk that apply to American style options. Index-based options carry significant risks, primarily the potential to lose the entire premium paid if the index does not move in the anticipated direction before expiration. Key risks include time decay, i.e., reducing the options value due to a limited life span. Index options are sensitive to market volatility, which can quickly erase the value of the option. Index-based options are complex due to managing expiration, settlement, and market timing. While options allow the investor to control a large index position with little capital, the leverage may work against you, magnifying losses when the market moves against your position.

Index options have some unique characteristics as more fully described below:

- **Tax treatment:** The IRS considers many broad-based index options to be Section 1256 contracts, qualifying them for 60/40 tax treatment. This means 60% of any gains from the position are taxed at the lower long-term capital gains rate, while just 40% are taxed as short-term capital gains at the ordinary rate. However, one thing to be aware of is that 1256 contracts are subject to mark-to-market rules. This means any contracts open at the end of the tax year must be treated as if they were sold at a fair market value. Because this rule applies whether an option is sold or not, a trader could experience an unrealized gain or loss.
- **Cash settlement:** All index options are cash-settled, meaning cash (not shares of stock) changes hands when contracts are assigned or exercised. The amount of cash is based on the difference between the strike price of the option and the settlement value of the index at expiration.
- **European-style settlement:** Options on the SPX and many other indexes settle European style, meaning exercise or assignment can only take place at expiration and not before. This standard settlement prevents early assignment.
- **Leverage:** SPX options have a 100 multiplier, which provides the potential to offset a substantial decline in the portfolio and can involve a relatively small upfront cost for broad-market exposure, depending on the strike price and expiration date. But just as leverage can magnify gains, it can also magnify losses.
- **Post-market trading:** Chicago Board of Options Exchange ("CBOE") index options, such as those on the SPX and Russell 2000®, trade after hours. Trading in these contracts closes at 3:15 p.m. CT, fifteen minutes after the equity market closes.

The investor is advised to review the Options Clearing Corporation Disclosure Document, which explains the mechanics, terminology, and risks of option trading prior to investing and to discuss with your financial advisor how the use of index options may fit into your portfolio.

C. Security-Specific Material Risks

There is an inherent risk for clients who have their investment portfolios heavily weighted in one security, one industry or industry sector, one geographic location, one investment manager, one type of investment instrument (equities versus fixed income). Clients who have diversified portfolios, as a general rule, incur less volatility and therefore less fluctuation in portfolio value than those who have concentrated holdings. Concentrated holdings may offer the potential for higher gain, but also offer the potential for significant loss.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There is nothing to report on this item.

B. Administrative Enforcement Proceedings

There is nothing to report on this item.

C. Self-Regulatory Organization Enforcement Proceedings

There is nothing to report on this item.

Item 10: Other Financial Industry Activities and Affiliations

A. Broker-Dealer or Representative Registration

Waterloo Capital nor its affiliates are registered broker-dealers and do not have an application to register pending.

Certain registered advisory personnel of Waterloo Capital may be registered representatives of a broker-dealer. Please see Item 10.C. below.

B. Futures or Commodity Registration

Neither Waterloo Capital nor its affiliates are registered as a commodity firm, futures commission merchant, commodity pool operator, or commodity trading adviser and do not have an application to register pending.

C. Material Relationships Maintained by this Advisory Business and Conflicts of Interest

C.1. Insurance Activities

Waterloo Capital is an insurance agency. Certain managers, members, and registered employees of Waterloo Capital are licensed insurance agents either through Waterloo Capital or through unaffiliated insurance agencies. Such professionals may recommend insurance products offered or sold through such agencies and be paid a commission for doing so. Such commission-based compensation results in a conflict of interest. Please be advised that the firm strives to put its clients' interests first and foremost and only recommends insurance products that fill a bona fide client need and are in the clients' best interests.

C.2. Intelligent Wealth Solutions LLC

Intelligent Wealth Solutions LLC ("IWS") is an affiliate of Waterloo Capital and a registered investment adviser. IWS manages individual separate accounts for its advisory clients. Prospective clients are advised that Waterloo Capital has an economic interest in recommending its affiliate, IWS, for separate account management. Conversely, IWS has an economic interest in recommending Waterloo Capital to clients.

C.3. Private Investments

From time to time, we may recommend investment opportunities in private companies sourced either by Waterloo Capital or by one of our clients. Although we perform comprehensive due diligence on all investment opportunities we recommend to our clients and would only endeavor to recommend private company investments that are in our clients' best interests, those sourced by clients create conflicts of interest. We may be viewed as recommending such a client-sourced investment to garner favor or to preserve our business relationship with such client. Although we employ a rigorous investment due diligence process, you should be aware

of this conflict. We mitigate such conflicts through investor qualification, due diligence, disclosure, and pricing. For example, we only recommend private company investments to Qualified Investors as defined by the Investment Advisers Act of 1940. In addition, our fees for evaluating and recommending private company investments are generally based on a fixed consulting fee unless we obtain a valuation from an appropriately qualified unaffiliated third-party valuation firm. We generally do not peg our fees to the valuation of the underlying security (unless we obtain an independent third-party valuation), thereby mitigating the incentive to cause or place a high valuation that would either benefit our client or serve to inflate our advisory fees. You should ask your Waterloo Capital professional for more detailed information on conflicts and conflict mitigation associated with private company investments.

C.4. IFI Deposit Program

Waterloo Capital may refer clients to IFI's Deposit Program for higher interest rate bearing accounts. In the event a client opens an account through IFI, a portion of the client's fee will be paid to Waterloo Capital as a referral fee. This creates a conflict of interest in that there is an incentive to recommend IFI based on the receipt of this compensation instead of what is in the best interest of our clients.

C.5. Waterloo Capital Dallas Office Location

Waterloo Capital's Dallas office is owned by a client with whom the firm has entered into an arms-length arrangement as a tenant. This arrangement may pose a conflict of interest as the firm has an economic incentive to favor this client in terms of time spent on advisory activities, investment recommendations, and trade allocations. The firm has policies and procedures in place to mitigate these conflicts.

C.6. Charles Murphy

Charles Murphy, an investment adviser representative of Waterloo Capital, is dually registered as an investment adviser representative with Liberty Park Capital Management, LLC, a registered investment adviser, of which he is also the Managing Member. This creates a conflict of interest in that Charles Murphy has an economic incentive to recommend the services of the investment adviser that yields him the greatest economic advantage rather than what is in the client's best interest.

Charles Murphy is a registered representative and Managing Partner of Finalis Securities LLC, a FINRA-registered broker-dealer. Finalis Securities is a financial services company engaged in the sale of investment products. Charles Murphy receives transaction or commission compensation from Finalis Securities for effecting securities transactions for advisory clients. The recommendation of securities transactions for commission creates a conflict of interest in that Charles Murphy is economically incented to effect securities transactions for clients.

C.7. Dax Weindorf

Dax Weindorf, an investment adviser representative of Waterloo Capital, is a registered representative of The Leaders Group, Inc., a FINRA-registered broker-dealer. The Leaders Group is a financial services company engaged in the sale of investment products. Dax Weindorf

receives transaction or commission compensation from The Leaders Group for effecting securities transactions for advisory clients. The recommendation of securities transactions for commission creates a conflict of interest in that Dax Weindorf is economically incented to effect securities transactions for clients.

C.8. George Stanley Abiassi

George Stanley "Stan" Abiassi, an investment adviser representative of Waterloo Capital, is a registered representative of Pickwick Capital Partners, LLC, a FINRA-registered broker-dealer. Pickwick Capital Partners is a financial services company engaged in the sale of investment products. Stan Abiassi receives transaction or commission compensation from Pickwick Capital Partners for effecting securities transactions for advisory clients. The recommendation of securities transactions for commission creates a conflict of interest in that Stan Abiassi is economically incented to effect securities transactions for clients.

C.9 Market Street Private Wealth, LLC

George Stanley "Stan" Abiassi, an investment adviser representative of Waterloo Capital, is the Managing Member of Market Street Private Wealth, LLC ("Market Street"), which sponsors and/or manages a private fund ("Fund"). Due to an economic relationship between Waterloo Capital and Market Street, both firms have an economic incentive to recommend the use of the Fund in Waterloo Capital and its affiliate's advisory accounts. Detailed information on the Fund is provided in the Fund's Offering Documents.

D. Recommendation or Selection of Other Investment Advisors and Conflicts of Interest

Waterloo Capital may engage sub-advisers to manage all or a portion of the client's assets. Waterloo Capital's fees are separate and distinct from the sub-advisers it utilizes. Waterloo Capital will always act in the best interests of the client, including when determining which sub-advisers to recommend and/or utilize for clients. Clients are under no obligation to use any third-party provider recommended by Waterloo Capital and may use the provider of their choice.

Item 11: Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading

A. Code of Ethics Description

Waterloo Capital has adopted a Code of Ethics (“Code”) to address the securities-related conduct of its advisory representatives and employees. The Code includes the firm’s policies and procedures developed to protect clients’ interests in relation to the following:

- The duty at all times to place clients’ interests ahead of the firm’s
- That all personal securities transactions of Waterloo Capital advisory representatives and employees be conducted in a manner consistent with the Code and avoid any actual or potential conflict of interest, or any abuse of an advisory representative’s or employee’s position of trust and responsibility
- That advisory representatives may not take inappropriate advantage of their positions
- That information concerning the identity of clients’ security holdings and financial circumstances are confidential
- That independence in the investment decision-making process is paramount

The firm will provide a copy of the Code to clients or any prospective client upon request.

B. Investment Recommendations Involving a Material Financial Interest and Conflicts of Interest

The firm does not engage in principal trading (i.e., the practice of selling stock to advisory clients from a firm’s inventory or buying stocks from advisory clients into a firm’s inventory). In addition, the firm does not recommend any securities to advisory clients in which it has some proprietary or ownership interest.

C. Advisory Firm Purchase or Sale of Same Securities Recommended to Clients and Conflicts of Interest

The firm, its affiliates, employees and their families, trusts, estates, charitable organizations, and retirement plans established by it may purchase or sell the same securities as are purchased or sold for clients in accordance with its Code of Ethics policies and procedures. The personal securities transactions by advisory representatives and employees may raise potential conflicts of interest when they trade in a security that is:

- owned by the client, or
- considered for purchase or sale for the client.

Such conflict generally refers to the practice of front-running (trading ahead of the client), which the firm specifically prohibits. The firm has adopted policies and procedures that are intended to address these conflicts of interest. These policies and procedures:

- require our advisory representatives and employees to act in the client’s best interest

- prohibit fraudulent conduct in connection with the trading of securities in a client account
- prohibit employees from personally benefitting by causing a client to act, or fail to act in making investment decisions
- prohibit the firm or its employees from profiting or causing others to profit on knowledge of completed or contemplated client transactions
- allocate investment opportunities in a fair and equitable manner
- provide for the review of transactions to discover and correct any trades that result in an advisory representative or employee benefitting at the expense of a client.

Advisory representatives and employees must follow the firm's procedures when purchasing or selling the same securities purchased or sold for the client.

D. Client Securities Recommendations or Trades and Concurrent Advisory Firm Securities Transactions and Conflicts of Interest

The firm, its affiliates, employees and their families, trusts, estates, charitable organizations, and retirement plans established by it may effect securities transactions for their own accounts that differ from those recommended or effected for other if the firm's clients. The firm will make a reasonable attempt to trade securities in client accounts at or prior to trading the securities in its affiliate, corporate, employee or employee-related accounts. Trades executed the same day will likely be subject to an average pricing calculation (please refer to Item 12.B.3 Order Aggregation). It is the policy of the firm to place the client's interests above those of the firm and its employees.

Item 12: Brokerage Practices

A. Factors Used to Select Broker-Dealers for Client Transactions

A.1. Custodian Recommendations

Waterloo Capital may recommend that clients establish brokerage accounts with the Schwab Advisor Services division of Charles Schwab & Co., Inc. ("Schwab" or "custodian"), a FINRA-registered broker-dealer and SIPC member, to maintain custody of clients' assets and to effect trades for their accounts. Although the firm may recommend that clients establish accounts at the custodian, it is the client's decision to custody assets with the custodian. The firm is independently owned and operated and not affiliated with the custodian. For Waterloo Capital-managed advisory accounts, the custodian generally does not charge separately for custody services but is compensated by account holders through commissions and other transaction-related or asset-based fees for securities trades that are executed through the custodian or that settle into the custodian's accounts.

In certain instances and subject to approval by the firm, the firm will recommend to clients certain broker-dealers and/or custodians based on the needs of the individual client, taking into consideration the nature of the services required, the experience of the broker-dealer or custodian, the cost and quality of the services, and the reputation of the broker-dealer or custodian. The final determination to engage a broker-dealer or custodian recommended by the firm will be made by and in the sole discretion of the client. The client recognizes that broker-dealers and/or custodians have different cost and fee structures and trade execution capabilities; as a result, there may be disparities with respect to the cost of services and/or the transaction prices for securities transactions executed on behalf of the client. Clients are responsible for assessing the commissions and other costs charged by broker-dealers and/or custodians.

A.1.a. How We Select Brokers/Custodians to Recommend

The firm seeks to recommend a custodian/broker who will hold client assets and execute transactions on terms that are overall most advantageous when compared to other available providers and their services. We consider a wide range of factors, including, among others, the following:

- combination of transaction execution services along with asset custody services (generally without a separate fee for custody)
- capability to execute, clear, and settle trades (buy and sell securities for client accounts)
- capabilities to facilitate transfers and payments to and from accounts (wire transfers, check requests, bill payment, etc.)
- breadth of investment products made available (stocks, bonds, mutual funds, exchange-traded funds (ETFs), etc.)
- availability of investment research and tools that assist us in making investment decisions
- quality of services

- competitiveness of the price of those services (commission rates, margin interest rates, other fees, etc.) and willingness to negotiate them
- reputation, financial strength, and stability of the provider
- their prior service to us and our other clients
- availability of other products and services that benefit us, as discussed below

A.1.b. Client's Custody and Brokerage Costs

For client accounts that the firm maintains, the custodian generally does not charge clients separately for custody services but is compensated by charging either transaction fees or custodian asset-based fees on trades that it executes or that settle into the custodian's accounts. For some accounts, the custodian may charge a percentage of the dollar amount of assets in the account in lieu of commissions. The custodian's commission rates and asset-based fees applicable to the firm's client accounts were negotiated based on the firm's commitment to maintain a certain minimum amount of client assets at the custodian. This commitment benefits the client because the overall commission rates and asset-based fees paid are lower than they would be if the firm had not made the commitment. In addition to commissions or asset-based fees, the custodian charges a flat dollar amount as a "prime broker" or "trade away" fee for each trade that the firm has executed by a different broker-dealer but where the securities bought or the funds from the securities sold are deposited (settled) into the client's custodian account. These fees are in addition to the commissions or other compensation the client pays the executing broker-dealer. Because of this, in order to minimize the client's trading costs, the firm has the custodian execute most trades for the account.

A.1.c. Soft Dollar Arrangements

The firm does not utilize soft dollar arrangements. The firm does not direct brokerage transactions to executing brokers for research and brokerage services.

A.1.d. Institutional Trading and Custody Services

The custodian provides the firm with access to its institutional trading and custody services, which are typically not available to the custodian's retail investors. These services generally are available to independent investment advisors on an unsolicited basis, at no charge to them so long as a certain minimum amount of the advisor's clients' assets are maintained in accounts at the custodian. The custodian's brokerage services include the execution of securities transactions, custody, research, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment.

A.1.e. Other Products and Services

The custodian also makes available to the firm other products and services that benefit Waterloo Capital but may not directly benefit its clients' accounts. Many of these products and services may be used to service all or some substantial number of the firm's accounts,

including accounts not maintained at the custodian. The custodian also makes available to the firm its managing and administering software and other technology that

- provide access to client account data (such as trade confirmations and account statements)
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts
- provide research, pricing and other market data
- facilitate payment of Waterloo Capital's fees from its clients' accounts
- assist with back-office functions, recordkeeping and client reporting

The custodian may also offer other services intended to help the firm manage and further develop its business enterprise. These services may include

- compliance, legal and business consulting
- publications and conferences on practice management and business succession
- access to employee benefits providers, human capital consultants and insurance providers

The custodian may also provide other benefits such as educational events or occasional business entertainment of the firm's personnel. In evaluating whether to recommend that clients custody their assets at the custodian, the firm may take into account the availability of some of the foregoing products and services and other arrangements as part of the total mix of factors it considers and not solely on the nature, cost or quality of custody and brokerage services provided by the custodian, which creates a conflict of interest.

A.1.f. Independent Third Parties

The custodian may make available, arrange and/or pay third-party vendors for the types of services rendered to the firm. The custodian may discount or waive fees it would otherwise charge for some of these services or all or a part of the fees of a third party providing these services to the firm.

A.1.g. Additional Compensation Received from Custodians

The firm may participate in institutional customer programs sponsored by broker-dealers or custodians. The firm may recommend these broker-dealers or custodians to clients for custody and brokerage services. There is no direct link between the firm's participation in such programs and the investment advice it gives to its clients, although the firm receives economic benefits through its participation in the programs that are typically not available to retail investors. These benefits may include the following products and services (provided without cost or at a discount):

- Receipt of duplicate client statements and confirmations
- Research-related products and tools
- Consulting services
- Access to a trading desk serving the firm's participants

- Access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts)
- The ability to have advisory fees deducted directly from client accounts
- Access to an electronic communications network for client order entry and account information
- Access to mutual funds with no transaction fees and to certain institutional money managers
- Discounts on compliance, marketing, research, technology, and practice management products or services provided to the firm by third-party vendors

The custodian may also pay for business consulting and professional services received by the firm's related persons, and may pay or reimburse expenses (including travel, lodging, meals and entertainment expenses for the firm's personnel to attend conferences). Some of the products and services made available by such custodian through its institutional customer programs may benefit the firm but may not benefit its client accounts. These products or services may assist the firm in managing and administering client accounts, including accounts not maintained at the custodian as applicable. Other services made available through the programs are intended to help the firm manage and further develop its business enterprise. The benefits received by the firm or its personnel through participation in these programs do not depend on the amount of brokerage transactions directed to the broker-dealer.

The firm also participates in similar institutional advisor programs offered by other independent broker-dealers or trust companies, and its continued participation may require the firm to maintain a predetermined level of assets at such firms. In connection with its participation in such programs, the firm will typically receive benefits similar to those listed above, including research, payments for business consulting and professional services received by the firm's related persons, and reimbursement of expenses (including travel, lodging, meals and entertainment expenses for the firm's personnel to attend conferences sponsored by the broker-dealer or trust company).

As part of its fiduciary duties to clients, the firm endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by the firm or its related persons in and of itself creates a conflict of interest and indirectly influences the firm's recommendation of broker-dealers for custody and brokerage services.

A.1.h. The Firm's Interest in Custodian's Services

The availability of these services from the custodian benefits the firm because the firm does not have to produce or purchase them. These services are not contingent upon the firm committing any specific amount of business to the custodian in trading commissions or assets in custody. Custodian's services give the firm an incentive to recommend that clients maintain their accounts with the custodian based on the firm's interest in receiving the custodian's services that benefit the firm's business rather than based on the client's interest in receiving the best value in custody services and the most favorable execution of client transactions. This is a conflict of interest. The firm believes, however, that the selection of the custodian as custodian and broker is in the best interest of clients. It is primarily supported by the scope,

quality, and price of the custodian's services and not the custodian's services that benefit only the firm.

A.2. Brokerage for Client Referrals

The firm does not engage in the practice of directing brokerage commissions in exchange for the referral of advisory clients.

A.3. Directed Brokerage

A.3.a. Waterloo Capital Recommendations

The firm typically recommends Schwab as custodian for clients' funds and securities and to execute securities transactions on its clients' behalf.

A.3.b. Client-Directed Brokerage

Occasionally, clients may direct the firm to use a particular broker-dealer to execute portfolio transactions for their account or request that certain types of securities not be purchased for their account. Clients who designate the use of a particular broker-dealer should be aware that they will lose any possible advantage the firm derives from aggregating transactions. Such client trades are typically effected after the trades of clients who have not directed the use of a particular broker-dealer. The firm loses the ability to aggregate trades with other of the firm's advisory clients, potentially subjecting the client to inferior trade execution prices as well as higher commissions.

B. Aggregating Securities Transactions for Client Accounts

B.1. Best Execution

Waterloo Capital, pursuant to the terms of its investment advisory agreement with clients, has discretionary authority to determine which securities are to be bought and sold, and the amount of such securities. The firm recognizes that the analysis of execution quality involves a number of factors, both qualitative and quantitative. The firm will follow a process in an attempt to ensure that it is seeking to obtain the most favorable execution under the prevailing circumstances when placing client orders. These factors include but are not limited to the following:

- The financial strength, reputation and stability of the broker
- The efficiency with which the transaction is effected
- The ability to effect prompt and reliable executions at favorable prices (including the applicable dealer spread or commission, if any)
- The availability of the broker to stand ready to effect transactions of varying degrees of difficulty in the future
- The efficiency of error resolution, clearance and settlement
- Block trading and positioning capabilities
- Performance measurement

- Online access to computerized data regarding customer accounts
- Availability, comprehensiveness, and frequency of brokerage and research services
- Commission rates
- The economic benefit to the client
- Related matters involved in the receipt of brokerage services

Consistent with its fiduciary responsibilities, the firm seeks to ensure that clients receive best execution with respect to clients' transactions by blocking client trades to reduce commissions and transaction costs. To the best of the firm's knowledge, these custodians provide high-quality execution, and the firm's clients do not pay higher transaction costs in return for such execution.

Commission rates and securities transaction fees charged to effect such transactions are established by the client's independent custodian and/or broker-dealer. Based upon its own knowledge of the securities industry, the firm believes that such commission rates are competitive within the securities industry. Lower commissions or better execution may be able to be achieved elsewhere.

B.2. Security Allocation

Since Waterloo Capital may be managing accounts with similar investment objectives, the firm may aggregate orders for securities for such accounts. In such event, allocation of the securities so purchased or sold, as well as expenses incurred in the transaction, is made by the firm in the manner it considers to be the most equitable and consistent with its fiduciary obligations to such accounts.

The firm's allocation procedures seek to allocate investment opportunities among clients in the fairest possible way, taking into account the clients' best interests. The firm will follow procedures to ensure that allocations do not involve a practice of favoring or discriminating against any client or group of clients. Account performance is never a factor in trade allocations.

The firm's advice to certain clients and entities and the action of the firm for those and other clients are frequently premised not only on the merits of a particular investment, but also on the suitability of that investment for the particular client in light of his or her applicable investment objective, guidelines and circumstances. Thus, any action of the firm with respect to a particular investment may, for a particular client, differ or be opposed to the recommendation, advice, or actions of the firm to or on behalf of other clients.

B.3. Order Aggregation

Orders for the same security entered on behalf of more than one client will generally be aggregated (i.e., blocked or bunched) subject to the aggregation being in the best interests of all participating clients. Subsequent orders for the same security entered during the same trading day may be aggregated with any previously unfilled orders. Subsequent orders may also be aggregated with filled orders if the market price for the security has not materially changed and the aggregation does not cause any unintended duration exposure. All clients participating

in each aggregated order will receive the average price and, subject to minimum ticket charges and possible step outs, pay a pro rata portion of commissions.

To minimize performance dispersion, "strategy" trades should be aggregated and average priced. However, when a trade is to be executed for an individual account and the trade is not in the best interests of other accounts, then the trade will only be performed for that account. This is true even if the firm believes that a larger size block trade would lead to best overall price for the security being transacted.

B.4. Allocation of Trades

All allocations will be made prior to the close of business on the trade date. In the event an order is "partially filled," the allocation will be made in the best interests of all the clients in the order, taking into account all relevant factors including, but not limited to, the size of each client's allocation, clients' liquidity needs and previous allocations. In most cases, accounts will get a pro forma allocation based on the initial allocation. This policy also applies if an order is "over-filled."

The firm acts in accordance with its duty to seek best price and execution and will not continue any arrangements if the firm determines that such arrangements are no longer in the best interest of its clients.

Item 13: Review of Accounts

A. Schedule for Periodic Review of Client Accounts or Financial Plans and Advisory Persons Involved

All client accounts are monitored on an ongoing basis, with a formal review conducted at least annually or as agreed upon with individual clients. The reviews focus on the consistency of portfolio investments with each client's stated objectives and risk tolerances. Reviews also consider investment restrictions requested by individual clients, investment time horizons, liquidity needs, tax considerations, and other circumstances unique to each client.

On a quarterly basis, the performance of each client account is reviewed to monitor consistency with market benchmarks that we deem applicable. Account reviews may also be triggered by other factors such as changes in general economic and market conditions, analyst reports, issuer news, and interest rate movement.

Cash levels are reviewed at least quarterly. After consideration of the above factors, allocation and investment determinations are made. Thereafter, accounts are reviewed on a transaction, monthly, quarterly, or annual basis as needed. At least annually, accounts are rebalanced to their strategic and tactical allocations. Account reviews may be triggered by potential change (beyond client's needs) including analyst reports, company news, fund management change, and interest rate movement.

Waterloo Capital's CEO is responsible for all reviews.

B. Review of Client Accounts on Non-Periodic Basis

The firm may perform ad hoc reviews on an as-needed basis if there have been material changes in the client's investment objectives or risk tolerance, or a material change in how the firm formulates investment advice.

C. Content of Client-Provided Reports and Frequency

Clients will receive statements from their custodian/broker-dealer at least quarterly. These statements identify the current investment holdings, the cost of each of those investments, and their current market values. The custodian's statement is the official record of the client's securities account and supersedes any statements or reports created on behalf of the client by Waterloo Capital. Clients will also receive performance analysis reports prepared by Waterloo Capital which describe the returns realized on the investments in their accounts.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided to the Advisory Firm from External Sources and Conflicts of Interest

A.1. Custodian Benefits

Waterloo Capital receives an economic benefit from custodians in the form of the support products and services they make available to us. These products and services, how they benefit us, and the related conflicts of interest are described in this Brochure under Item 12: Brokerage Practices. The availability to us of custodians' products and services is not based on us giving particular investment advice, such as buying particular securities for our clients.

A.2. Schwab Advisor Services Advisory Board Membership

John Chatmas, CEO of Waterloo Capital, serves on the Schwab Advisor Services Advisory Board (the "Advisory Board"). As described under Item 12 of this Brochure, Waterloo Capital may recommend that clients establish brokerage accounts with Charles Schwab & Co., Inc. ("Schwab") and/or its affiliates to maintain custody of the clients' assets and effect trades for their accounts. The Advisory Board consists of representatives of independent investment advisory firms who have been invited by Schwab management to participate in meetings and discussions of Schwab Advisor Services' services for independent investment advisory firms and their clients. Advisory Board members enter into nondisclosure agreements with Schwab under which they agree not to disclose confidential information shared with them. This information generally does not include material nonpublic information about the Charles Schwab Corporation, whose common stock is listed for trading on the New York Stock Exchange (symbol SCHW). The Advisory Board meets in person or virtually approximately twice per year and has periodic conference calls scheduled as needed. Advisory Board members are not compensated by Schwab for their service, but Schwab does pay for or reimburse Advisory Board members' travel, lodging, meals, and other incidental expenses incurred in attending Advisory Board meetings.

B. Advisory Firm Payments for Client Referrals

The firm may enter into agreements with Solicitors who will refer prospective advisory clients to the firm in return for a portion of the ongoing investment advisory fee our firm collects. Generally, when the firm engages a Solicitor, such Solicitor is compensated through receipt of a portion of the advisory fees we collect from our advisory clients. The receipt of such fees creates a conflict of interest in that the Solicitor is economically incented to recommend our services because of the existence of a fee sharing arrangement with our firm. Please be advised that the firm's payment of a referral fee to the Solicitor does not increase the client's advisory fee paid to the firm.

Item 15: Custody

Waterloo Capital is considered to have custody of client assets for purposes of the Advisers Act for the following reasons:

- The client authorizes us to instruct their custodian to deduct our advisory fees directly from the client's account. The custodian maintains actual custody of clients' assets.
- On certain accounts, our authority to direct client requests, utilizing standing instructions, for wire transfer of funds for first-party money movement and third-party money movement (checks and/or journals, ACH, Fed-wires). The firm has elected to meet the SEC's seven conditions to avoid the surprise custody exam, as outlined below:
 1. The client provides an instruction to the qualified custodian, in writing, that includes the client's signature, the third party's name, and either the third party's address or the third party's account number at a custodian to which the transfer should be directed.
 2. The client authorizes the investment adviser, in writing, either on the qualified custodian's form or separately, to direct transfers to the third party either on a specified schedule or from time to time.
 3. The client's qualified custodian performs appropriate verification of the instruction, such as a signature review or other method to verify the client's authorization, and provides a transfer of funds notice to the client promptly after each transfer.
 4. The client has the ability to terminate or change the instruction to the client's qualified custodian.
 5. The investment adviser has no authority or ability to designate or change the identity of the third party, the address, or any other information about the third party contained in the client's instruction.
 6. The investment adviser maintains records showing that the third party is not a related party of the investment adviser or located at the same address as the investment adviser.
 7. The client's qualified custodian sends the client, in writing, an initial notice confirming the instruction and an annual notice reconfirming the instruction.

Individual advisory clients will receive at least quarterly account statements directly from their custodian containing a description of all activity, cash balances, and portfolio holdings in their accounts. Clients are urged to compare the account balance(s) shown on their account statements to the quarter-end balance(s) on their custodian's monthly statement. The custodian's statement is the official record of the account.

Item 16: Investment Discretion

Clients may grant a limited power of attorney to Waterloo Capital with respect to trading activity in their accounts by signing the appropriate custodian limited power of attorney form. In those cases, the firm will exercise full discretion as to the nature and type of securities to be purchased and sold and the amount of securities for such transactions. Investment limitations may be designated by the client as outlined in the investment advisory agreement.

In addition, subject to the terms of its investment advisory agreement, Waterloo Capital may be granted discretionary authority for the retention of independent third- sub-advisers. Under such terms, the firm would also exercise discretion as to the executing broker to be used for securities transactions and the amount of commissions to be paid. Please see the applicable third-party sub-adviser's disclosure brochure for detailed information relating to discretionary authority.

Item 17: Voting Client Securities

Waterloo Capital does not take discretion with respect to voting proxies on behalf of its clients. The firm will endeavor to make recommendations to clients on voting proxies regarding shareholder vote, consent, election or similar actions solicited by, or with respect to, issuers of securities beneficially held as part of the firm's supervised and/or managed assets. In no event will the firm take discretion with respect to voting proxies on behalf of its clients.

Except as required by applicable law, the firm will not be obligated to render advice or take any action on behalf of clients with respect to assets presently or formerly held in their accounts that become the subject of any legal proceedings, including bankruptcies.

From time to time, securities held in the accounts of clients will be the subject of class action lawsuits. The firm has no obligation to determine if securities held by the client are subject to a pending or resolved class action lawsuit. The firm also has no duty to evaluate a client's eligibility or to submit a claim to participate in the proceeds of a securities class action settlement or verdict. Furthermore, the firm has no obligation or responsibility to initiate litigation to recover damages on behalf of clients who may have been injured as a result of actions, misconduct, or negligence by corporate management of issuers whose securities are held by clients.

Where the firm receives written or electronic notice of a class action lawsuit, settlement, or verdict affecting securities owned by a client, it will forward all notices, proof of claim forms, and other materials to the client. Electronic mail is acceptable where appropriate and where the client has authorized contact in this manner.

Item 18: Financial Information

A. Balance Sheet

Waterloo Capital does not require the prepayment of fees of \$1,200 or more, six months or more in advance, and as such is not required to file a balance sheet.

B. Financial Conditions Reasonably Likely to Impair Advisory Firm's Ability to Meet Commitments to Clients

The firm does not have any financial issues that would impair its ability to provide services to clients.

C. Bankruptcy Petitions During the Past Ten Years

There is nothing to report on this item.
